TITLE:

Synthetic mohair prepd. from

acrylonitrile! polymer -

having given fineness, non-circular

cross-section,

longitudinal grooves and suppleness

achieved by finishing

with cationically active cpd.

BASIC-ABSTRACT:

The 60-250 mm-long smooth or slightly crimped hairs consist

fine 1-10 tex. The fibre has a non-circular cross-section which is tangent, i

at least 3 points, to the periphery of an imaginary circle.

coarsely serrated edge are present in the longitudinal direction of the hair.

Suppleness is increased by finishing the hair with 0.1-2.5% of a cationically

active quat. fatty acid ester of formula (I). In (I), R1=1-3C alkyl; R2=1-3C alkylene; n=8-24.

ADVANTAGE - The strength and appearance of the mohair imitation correspond or are superior to those of natural mohair wool. The prod. has a soft, supple hand, a gloss typical of mohair lustre and resists moths and other insect pests.
